

WARNING

Be sure to read this user's manual thoroughly before use, and follow the instructions that it contains. This is critical for your safety, and will also prevent premature product failure due to incorrect use or installation.

BOX CONTENTS

The box contains a wheel and high pressure rim tape.

TOOLS REQUIRED

6mm Allen key.

8mm Allen key or 17 mm flat wrench.

IMPORTANT SAFETY INFORMATION

Rims are not compatible with rim brakes.

Check that the wheels are fastened securely before riding the bicycle. If the wheels are loose in any way, they may come off the bicycle and serious injury may result.

Products are not guaranteed against natural wear and deterioration from normal use and aging. The maximum total weight all loaded (rider + clothing + protective gear + backpack, luggage etc.) is 100 kg.

INSTALLATION

To mount the wheel in the frame or fork, turn the bolts until there is enough space for the fork blades or frame dropouts to properly engage with the hub cones. Next, tighten the side bolts with 25 Nm of torque.

Min. tire dimension – 1.75 inch

Max. tire dimension – 2.5 inch

Maximum tire pressure 6 Bar (87PSI) for 2.5 tire.

MAINTENANCE

The bearings should be lubricated about once a year.
